January 16-17, 2011

Palais des Congrès • Paris • France

3rd International Workshop on Wound Technology

The International Workshop on Wound Technology is the Europe-wide yearly congress of the Francophone CTS, the largest and most prestigious congress in the field, with delegates from a wide variety of specialities, including the CEO, scientists and clinicians.

For the Wound, the WIW will bring together international experts from a variety of disciplines, including the CTS. The main objective of the event is to reinforce the learning curve of cross-disciplinary functioning, the exchange of ideas, knowledge and new results. Wound care practitioners and researchers, medical engineers, biomaterials specialists, pharmacologists and biologists.
