2nd International Workshop on Wound Technology

The **International Workshop on Wound Technology** is the English-language component of the French CPC, the biggest woundhealing congress in the world. Held annually in Paris and attracting approximately 4000 attendees, the CPC is now in its 14th year.

For the 2nd year, the IWWT will feature international perspectives on wound technology, in parallel with the CPC. The main objective of this event is to reduce the learning curve of new technologies by facilitating the exchange of ideas, knowledge and experiences. Wound care practitioners and experts in new technologies are invited to participate in this transfer of information and expertise.

The topics to be discussed are closely related to the recent themes of the Journal of Wound Technology – Bioengineered Alternative Tissue, Debridement, Electrical Stimulation and Antiseptics.

FROM OCTOBER 30, 2009, THE IWWT PROGRAM WILL BE ONLINE AT: WWW.MFCONGRES.COM
